

PRODUCT NR. 365.00 10L CAN HOLDER

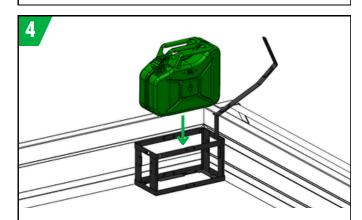

Select a safe position for the cans holder where it will be attached. When installing on a vehicle, please observe the legal requirements for add-on parts. If in doubt, contact the relevant authority for clarification

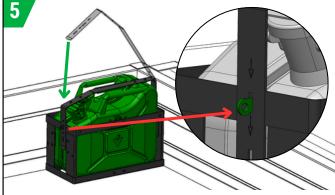

Make sure that crossbar is fully open to put in and remove the fuel can

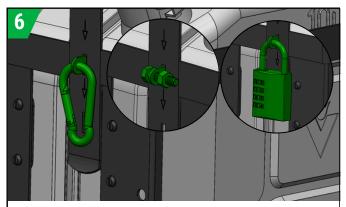

Select the right type of screw (\emptyset 8-6 mm) depending on the base material. Attach the holder to the base with two screws and at least one to the side (screws not included). Attaching a holder only from the side is not allowed

Place a 10L fuel can in the open can holder

Hook the latch over the clamp loop and ensure it is fully secured. It is not recommended to leave the holder under precipitation for a prolonged period

To prevent the holder from opening accidentally, for additional safety, hook a carabiner into the clamp loop, screw in an M6 bolt with a nut, or lock it with a padlock (not included)
